Are you working on relationships with medical doctors to gain more referrals? You are going to NEED this!

Download your copy of the latest whitepaper on the importance of CRMA spinal ligament injury testing and its effects on treatment outcomes.

There are 64 sources cited in this paper that all correlate that CRMA is essential to better rehabilitation results.

Get your copy today and add this to your arsenal of materials that are sure to get you more referrals from medical doctors.

**An Interview with Top  
Minnesota Injury Trial  
Attorney Talking About  
Traumatically Induced  
Accelerated Spinal  
Degeneration**

Attorney Douglas E. Schmidt has over 40 years of experience, in over 6,000 cases, in bringing justice to the victims of Personal Injury and Wrongful Death. He has lectured at the University of Minnesota Law School and the Hamline-Mitchell Law School, as well as Gustavus Adolphus College and Northwestern Health Sciences University.

He is a frequent lecturer at Continued Education seminars for both lawyers and chiropractors. He is the recipient of the Award of Merit of the American Bar Association and has received the Distinguished Service Award of the Minnesota Trial Lawyers Association. He has been AV rated by Martindale Hubbell for 35 years.

He has been certified by the National Board of Trial Advocacy as a Civil Trial Advocate and by the Minnesota Bar as a Civil Trial Specialist. He has successfully tried over 500 cases to a jury, judge, or arbitrator in Minnesota, South Dakota, Wisconsin and Iowa. Doug Schmidt is one of the top trial attorneys in the country that knows and lectures on spinal ligament injuries.

Join us for a Q&A Session on the merits of spinal ligament injury testing in a spinal injury case, as well as advancing your understanding on TRAUMATICALLY INDUCED "Accelerated Spinal Degeneration". When the spine has ligament damage that causes spinal instability, you can see accelerated degenerative changes.

He will explain how a 15-year-old girl had a 45-year-old neck by the time she was seventeen years old. He was able to prove that in court.

This is a do not miss presentation as we will do a Q&A at the end of this session.

Teamwork is the ability to work **together** toward a common vision. The ability to direct **individual** accomplishments toward organizational objectives. It is the **fuel** that allows common people to attain uncommon results.

-Andrew Carnegie

Goalcast

"Spinal kinetics has objectified ligament injuries. The proper diagnosis has greatly improved outcomes and Just As importantly been a huge asset with regard to litigation with auto insurance. Thank you, so much spinal kinetics. You are appreciated"

**DR CHRIS EFTHIMIOU, DC**  
DOCTOR OF CHIROPRACTIC

"The staff is always friendly and helpful. I accidentally went to Dr. Cronk's seminar in Eau Clair, WI in 2012. The best accident I ever had. The objective evidence has kept us out of court. I'm confident the training and objective evidence will prevail."

**FRANK MARTIN, DC**

## Embracing the benefits of telemedicine as a chiropractor

Jeffrey A. Cronk

May 6, 2020 | 3 minute read

The benefits of telemedicine meetings offer a convenient, functional workaround for chronic-pain sufferers and keeps patients on track

Chiropractors are in an excellent position to grow their practices and help patients feel their best by embracing the benefits of telemedicine. Perhaps no other area of medicine is better suited for remote appointments and digital treatment sessions.

Far-reaching chiropractic care strategies can be implemented from the office, but the injury-recovery process is a long game that requires ongoing mental and physical effort from patients. Telemedicine, and reassurances from medical professionals, can do much to improve patients' recovery speed, state of mind, and self-belief.

For these and not a few other reasons, there's never been a better time than now for chiropractors to equip their practices with telemedicine solutions.

## Did You Know?

**9 Out Of 10 Injury Patients Never Know The Primary Cause Of Their Pain\***

Can you guess which patient had  
CRMA Spinal Ligament Testing done?

\* <http://www.thegoodbody.com>

“In healthcare we need to do a lot less thinking and a lot more looking, as the solutions to some of our most expensive problems in the market, such as back and neck injuries are really easy to solve if we will just look, and of course this starts with diagnosis, but before that **we need to know what these injuries look like**, then and only then will we know how to standardly assess them.”
